

Adamson external confirmation: target-paired perturbation-specific recovery

● Outcome-fit seen ○ Outcome-fit unseen

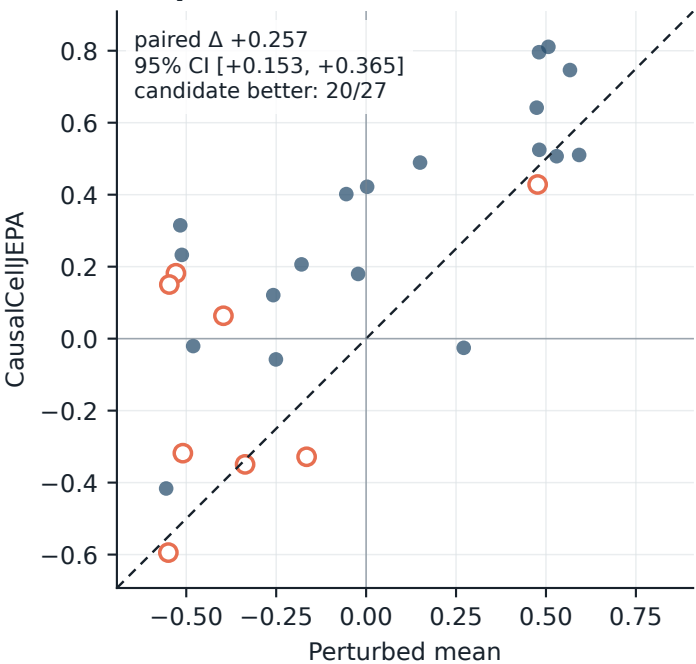

**a Systema Pearson · all genes
vs. perturbed mean**

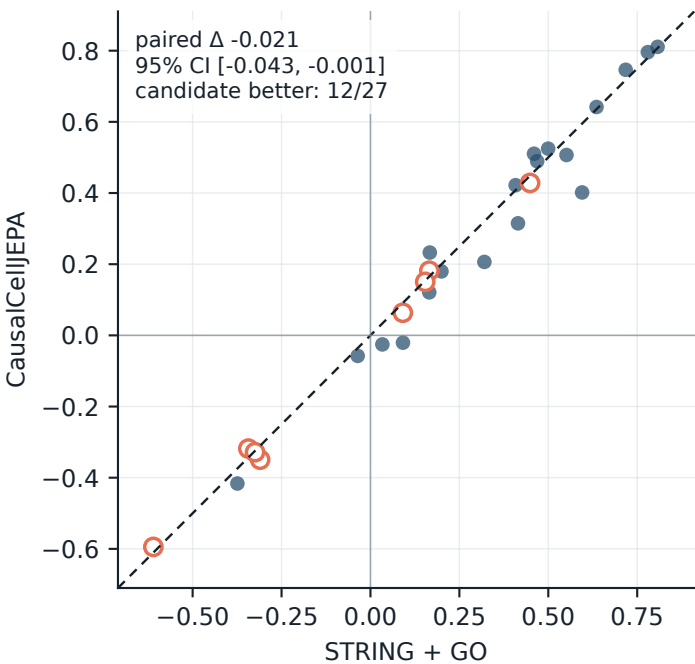

**b Systema Pearson · all genes
vs. STRING + GO**

**c Systema Pearson · target excluded
vs. perturbed mean**

**d Systema Pearson · target excluded
vs. STRING + GO**

Every preregistered target is shown. The diagonal denotes equal target performance; intervals are the frozen 10,000-resample target bootstrap.
